CLASSIFIED LIST OF SUBJECT INDEX HEADINGS

The headings are grouped into sections on the same basis as the arrangement of the abstracts in the fortnightly issues of Physics Abstracts. A summary of the layout of these sections (these are actually further subdivided), is given below. Each section lists the headings which concern its subject and it follows that many of the headings are listed in several places.

SUBJECT SECTIONS

01.00	GENERAL
02.00	MATHEMATICAL PHYSICS
03.00	MECHANICS. ELASTICITY. VIBRATION. ACOUSTICS
04.00	HEAT. THERMODYNAMICS
05.00	ELECTROMAGNETISM
06.00	ELECTRODYNAMICS & PARTICLE OPTICS
07.00	QUANTUM ELECTRONICS. QUANTUM OPTICS
08.00	OPTICS
09.00	QUANTUM FIELD THEORY
10.00	ELEMENTARY PARTICLES
11.00	ELEMENTARY PARTICLE & NUCLEAR MEASUREMENT
12.00	NUCLEAR PHYSICS
13.00	ATOMIC & MOLECULAR PHYSICS
14.00	FLUIDS
15.00	CHANGE OF STATE
16.00	SOLID-STATE STRUCTURE & MECHANICAL PROPERTIES
17.00	SOLID-STATE ELECTRICAL & MAGNETIC PROPERTIES
18.00	SOLID-STATE SPECTROSCOPY & OPTICAL PROPERTIES
19.00	PHYSICAL CHEMISTRY
20.00	GEOPHYSICS
21.00	ASTROPHYSICS
22.00	BIOPHYSICS
23.00	LABORATORY & EXPERIMENTAL TECHNIQUES

SUBSTANCES

Chemical elements and inorganic compounds

All the chemical elements are listed by name, followed by their compounds, e.g. "Cadmium, Cadmium compounds".

"Hydrogen" is subdivided by the subheadings "neutral atoms", "neutral molecules" and "ions". "Deuterium" and "Tritium" are independent headings. "Hydrogen compounds" is supplemented by "Ice", "Steam" and "Water".

"Oxygen" is supplemented by "Ozone" and "Carbon" is supplemented by "Diamonds" and "Graphite".

The following inorganic compounds are further subdivided by subheadings as shown:-

- Barium compounds/
    - barium titanate*
- Cadmium compounds/
    - cadmium sulphide
- Calcium compounds/
    - calcium fluoride
- Gallium compounds/
    - gallium arsenide†
- Indium compounds/
    - indium antimonide†
- Lithium compounds/
    - lithium fluoride
- Nitrogen compounds/
    - ammonia
    - ammonium compounds
- Potassium compounds/
    - potassium bromide
    - potassium chloride
- Sodium compounds/
    - sodium chloride
- Zinc compounds/
    - zinc sulphide

* Ferroelectric properties are listed under "Ferroelectric materials/barium titanate"

† Semiconducting properties are listed under the corresponding subheadings of "Semiconducting materials"

Organic compounds

Organic compounds are grouped under headings "Organic compounds", "Polymers", "Plastics", "Proteins". "Rochelle salt" is an independent heading.

Co-ordination compounds

Metallic co-ordination compounds are regarded as inorganic with a few exceptions and are indexed under the appropriate metallic compound heading (not under organic compounds), e.g. Ni complex, bis (dimethylglyoximato) nickel (II) under Nickel compounds.

Substance groups

In addition there are the following headings for groups of elements, compounds or substances:-

- Actinides
- Actinide compounds
- Alkali metals
- Alkali-metal compounds/
    - halides
- Alkaline-earth metals
- Alkaline-earth compounds
- Ferrites
- Ferroelectric materials/
    - barium titanate‡
- Garnets
- Halogens
- Inert gases
- Metals
- Minerals
- Rare-earth metals
- Rare-earth compounds
- Semiconductors
- Semiconducting materials/
    - gallium arsenide§
    - germanium§
    - indium antimonide§
    - silicon§
- Superconducting materials/
    - lead‖
    - niobium‖
- Transition metals
- Transition-metal compounds

‡ Used for ferroelectric properties only

§ Used for semiconducting properties only

‖ Used for superconducting properties only

Alloys

General papers on alloys are indexed under "Alloys". Alloys of specified composition are listed under, either

(i) special alloy headings (there are five of them: "Aluminium alloys", "Copper alloys", "Iron alloys", "Nickel alloys", "Steel"), e.g. Al-Ni alloys under "Aluminium alloys" and "Nickel alloys".

(ii) compounds of the named elements, e.g. Mn-Zn alloys under "Manganese compounds" and "Zinc compounds". Silicon-iron under "Iron alloys" and "Silicon compounds".

Special substances and materials

There are also the following special headings for certain common substances:-

- Air
- Blood
- Ceramics
- Clay
- Coal
- Concrete
- Fibres
- Gelatin
- Glass
- Mica
- Optical materials
- Paper
- Porous materials
- Powders
- Quartz
- Rubber
- Ruby
- Sand
- Seawater
- Soil
- Waxes
- Wood

ABSTRACTS AND CURRENT PAPERS JOURNALS

Three main subject areas are covered by INSPEC abstracts and current papers journals: physics, electrical and electronics engineering, and computer and control engineering. For each field an abstracts journal and a companion titles journal are published. The abstracts journals are intended as library tools for retrospective information retrieval, whereas the companion titles journals, which omit the abstracts and associated indexes, are intended as low-cost current-awareness tools for the individual.

SUBSCRIPTION PRICES

ABSTRACTS JOURNALS	Annual subscription Paper or microfiche	Annual subscription Combined paper and microfiche
Physics Abstracts (PA) Published every two weeks in conjunction with the American Institute of Physics, New York, and the Institute of Physics, London	£120	£180
Electrical & Electronics Abstracts (EEA) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£100	£150
Computer & Control Abstracts (CCA) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£50	£75
Combined Subscription to Electrical & Electronics Abstracts and Computer & Control Abstracts (EEA/CCA)	£120	£180

CURRENT PAPERS JOURNALS	Annual subscription IEE, AIP, IEEE, IOP, IERE members	Annual subscription Non-members
Current Papers in Physics (CPP) Published every two weeks in conjunction with the American Institute of Physics, New York, and the Institute of Physics, London	£7	£14
Current Papers in Electrical & Electronics Engineering (CPE) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£7	£14
Current Papers on Computers & Control (CPC) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£6	£12

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts*, and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

	Physics Abstracts		Electrical & Electronics Abstracts		Computer & Control Abstracts	
	Subject	Author	Subject	Author	Subject	Author
1955–59	£20	£20	£15	£20	—	—
1960–64	£40	£17	£20	£12	—	—
1965–68	£60	£25	£35	£20	—	—
1966–68	—	—	—	—	£15 (combined)

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are 48 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

These are produced, containing all the information included in the INSPEC publications. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

For more details of any of these services please write to:

2277. *Electrodynamics of Moving Bodies.* **A. Einstein.** (Ann. d. Physik, **17.** 5. pp. 891–921, Sept. 26, 1905.)—A mathematical investigation divided into a kinematical and an electrodynamical part. The former treats (1) Definition of contemporaneousness (Gleichzeitigkeit), (2) The relativity of lengths and times, (3) Theory of space- and time-transformations from resting to uniformly translated systems, (4) Physical significance of the equations obtained for moving rigid bodies, &c., (5) Addition theorem for velocities. The second part deals with (6) Maxwell-Hertz equations, (7) Doppler's principle and aberration, (8) Transformation of energy of light, Theory of radiation pressure on a perfect reflector, (9) Transformation of Maxwell-Hertz equations with reference to convection currents, (10) Dynamics of slowly accelerated electrons. ...you probably missed this Science Abstract

Einstein's paper on the special theory of relativity, published in September 1905, is only one of the many vital papers which have appeared in Science Abstracts since they began publication in 1898.

You can forgive yourself for missing that one, but are you sure there are no other knowledge gaps in your literature searches?

If there are, back issues of Science Abstracts will fill those gaps.

Abstracts journals, containing titles, authors, abstracts, together with information necessary to locate the source of the original document, are produced in three separate publications: Physics, Electrical & Electronics and Computer & Control Abstracts. They are also published in concurrent microfiche form.

Back issues of Science Abstracts can do for you what the apple did for Newton!

To obtain a quotation for supplying your missing issues, please write to:
